*We are working towards all our bottles being made of 100% rPET (recycled plastic). But unfortunately due to limited supply of rPET within the UK our suppliers can't always keep up with demand. This is what we set out to change. This means though that we can't currently guarantee the percentage of recycled plastic in every bottle, one thing is for sure, if it's available we'll get our hands on it!

**Excluding cap and label.
